

Dr Catherine GUÉRIN-DUBIARD is senior lecturer at AGROCAMPUS OUEST (Rennes), an institution for the teaching of life sciences, and she is a specialist in food science and technology in meat and sea products. She is a member of the "Bioactivity and Nutrition" team in UMR INRA science and technology of milk and egg. In research, she worked for several years, on hen egg proteins, and more particularly, on the optimization of protein separation techniques. She is actually working on the relationship between the structure of egg proteins and their digestion using in vitro static models. She is a member of the international network COST Action FA1005 (Infogest) coordinated by Dr Didier Dupont (INRA, France).
